

# DIY Bubble Blower!

## MATERIALS NEEDED

- Small Bowl
- Water Bottle
- Dish soap
- Scissors
- Towel
- Rubber Band

ESTIMATED TIME: 5-10 min

## STEPS

1. Fill a small bowl with water and dish soap. (The more soap you use, the bubblier it gets!)
2. Mix the water and soap for about 30 seconds.
3. Next, cut the bottom off of your water bottle with the scissors. (Be careful, scissors are sharp. Get an adult's or older brother's or sister's help with this part!)
4. Wrap a towel over the bottom of your bottle.
5. Wrap a rubber band around the towel so it stays in place. Now you're ready to make bubbles!!!
6. Gently, and I mean GENTLY, dip the towel into the mixture.
7. Then blow from the top and watch a stream of bubbles flow out from the bottom!
8. why don't you see how big you can make your bubbles?
